      |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |       
  |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |          |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

*Alpha First Read (2).* These are *entry* hubs for information wired from first reading hubs. The alphabetic columns to be read from the card are entered directly, as required, to condition the word to receive alphabetic information.

*Channel A (4).* These hubs are internally cable-connected to the channel A hubs on the card input-output unit control panel. They are normally used to carry information from the card input-output unit to the 654. The channel A hubs are added to the card input-output unit when it is to be used with the 654.

*Storage Entry A-B-C (5).* Each group of storage-entry hubs (A, B, or C) is independent of the other two. This arrangement permits the entry of information from at least three different card forms without using pilot selectors or co-selectors.

Only one group of storage entry hubs (A, B, or C) can be active during one particular card cycle. Storage-entry C hubs are normally active and are the only ones active on the 407. Storage-entry A hubs are made active by impulsing entry A hubs on 533 or 537 on the previous cycle. Storage-entry B hubs are made active by impulsing entry B hubs on 533 or 537 on the previous cycle.

Storage-entry hubs (A, B, or C) are normally impulsed from the second read station. The card columns to be entered are wired from the second reading station to channel A hubs on the card input-output unit. The corresponding channel A hubs on the 654 control panel are then wired to the five low-order digits of the storage-entry hubs.

*Word-Size Emitter (6).* These are *exit* hubs which are used to fill in zeros, automatically, to the left of the last storage-entry word position wired from the second reading station (numbered only).

*CAI (7).* These *exit* hubs emit a constant alphabetic impulse, except during load cards. These hubs can be used to impulse the desired alphabetic-in hubs.

*Word-Size Entry A-B-C (8).* These hubs are *entries* for the impulses from the word-size emitter hubs. They are receptive when their corresponding storage-entry hubs

are active. Only the C entries should be used on the 407.

They must be wired from word-size emitter hub 10 for each alphabetic word.

*Alpha in (9).* These *entry* hubs must be impulsed to set up the corresponding storage entry word to receive alphabetic information. Normally wired from the constant alphabetic impulse (CAI) exit hub.

NOTE: PSU, P+, RSU, and R+ are wired on the input-output machine. All expanded words operate similarly to words in the input-output unit.

#### OUTPUT

*Storage Exit (10).* These hubs emit the impulses which are used for punching or printing the result. They are normally wired to channel B hubs.

*Channel B (11).* These hubs are internally cable-connected to the channel B hubs on the card input-output units control panels. These are normally used to carry information from the 654 to the card input-output unit (storage-exit hubs to channel B entry on 654; channel B exit to PUNCH or PRINT on card input-output unit).

*AOI (12).* These *exit* hubs emit an early timed impulse and they can be used to impulse the desired alphabetic-out hubs.

*Alpha Out (13).* These *entry* hubs receive impulses to convert the corresponding storage-exit word to alphabetic output. Normally wired from the alphabetic-out impulse (AOI) exit hubs.

*Sign Control Exit (14).* These emit an early impulse when a minus amount is read out of the corresponding exit word. When wired through the channel hubs to the immediate pickup of pilot selectors or co-selectors on the 407, this impulse allows these selectors to transfer in sufficient time for the selection of card cycles, all cycles, and print cycles impulses. These hubs should not be used for 533 or 537 operations.

*533, 537 and 407 Control Panels.* Figure 41 shows the modified 533-537 control panel for use with the 654. Figure 42 shows the modified 407 control panel for use with the 654.

### Wiring Example

Alphabetic MLR cards are interspersed in file being fed into the system in the 533 Read Feed (Figure 43).

Single-line alphabetic headings are to be printed by the 407.

This sample application (Figure 44) illustrates the control-panel wiring, on each unit, for processing four alphabetic card columns. The wiring illustrated would be repeated to cover as many card columns as necessary to enter this entire address into the system.

### 533 OR 537 CONTROL PANEL WIRING (FIGURE 45)

1. At the first reading station, the 80-column 12-punch is sensed and filtered through the read column splits. This impulse enters the entry A hubs which conditions the storage entry A words to accept information. This impulse also picks pilot selector 1 through its X pickup.

2. The storage entry A words being conditioned to accept information allows the read impulse 8 to be

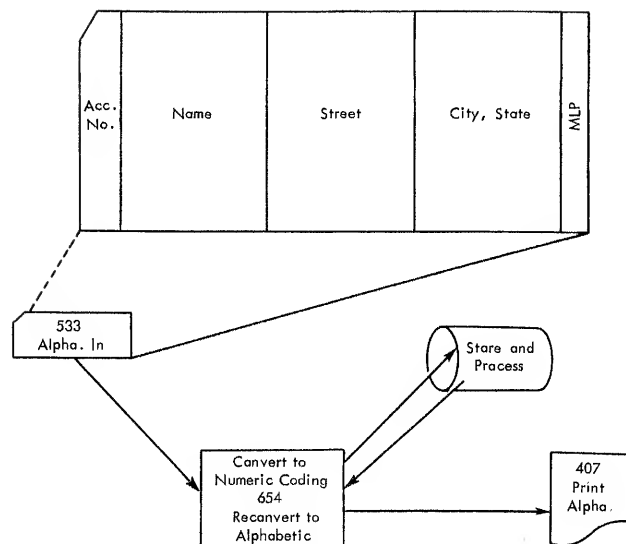

Figure 43. Data Flow Schematic

Figure 44. Data Flow Sample Application

Figure 45. 533 Control Panel Wiring

read into the units position of word 10. This 8 will be used to control the printed output.

3. The couple exit impulse from pilot selector 1 is fed into the channel A hub 80 for use on the 654 control panel.

4. The information that is read at the second reading station (read card B; numerical portion of word Jones) is fed into channel A hubs for use on the 654 control panel.

5. Sync sw wired on.

NOTE: The Sync sw on the 533-537 must be wired. It must be wired ON to use the expanded alphabetic unit. It must be wired OFF to use the 533-537 without the expanded alphabetic unit.

## 654 CONTROL PANEL WIRING (FIGURE 46)

3. The couple exit impulse conditioned by the 12 in the MLR card is transmitted through the cable to the channel A hubs. This impulse is wired to word 11 alphabetic-in hubs to condition the word 11 alphabetic first read hubs to accept the alphabetic zones from the first reading station.

4. Numerical portion of the alphabetic information (Jones) read at the second reading station (read card B) is fed through the cable on channel A to enter the storage entry A hubs for word 11. The storage entry A hubs are conditioned by the entry A hubs on the 533 control panel.

5. Zones for the alphabetic information (Jones) are

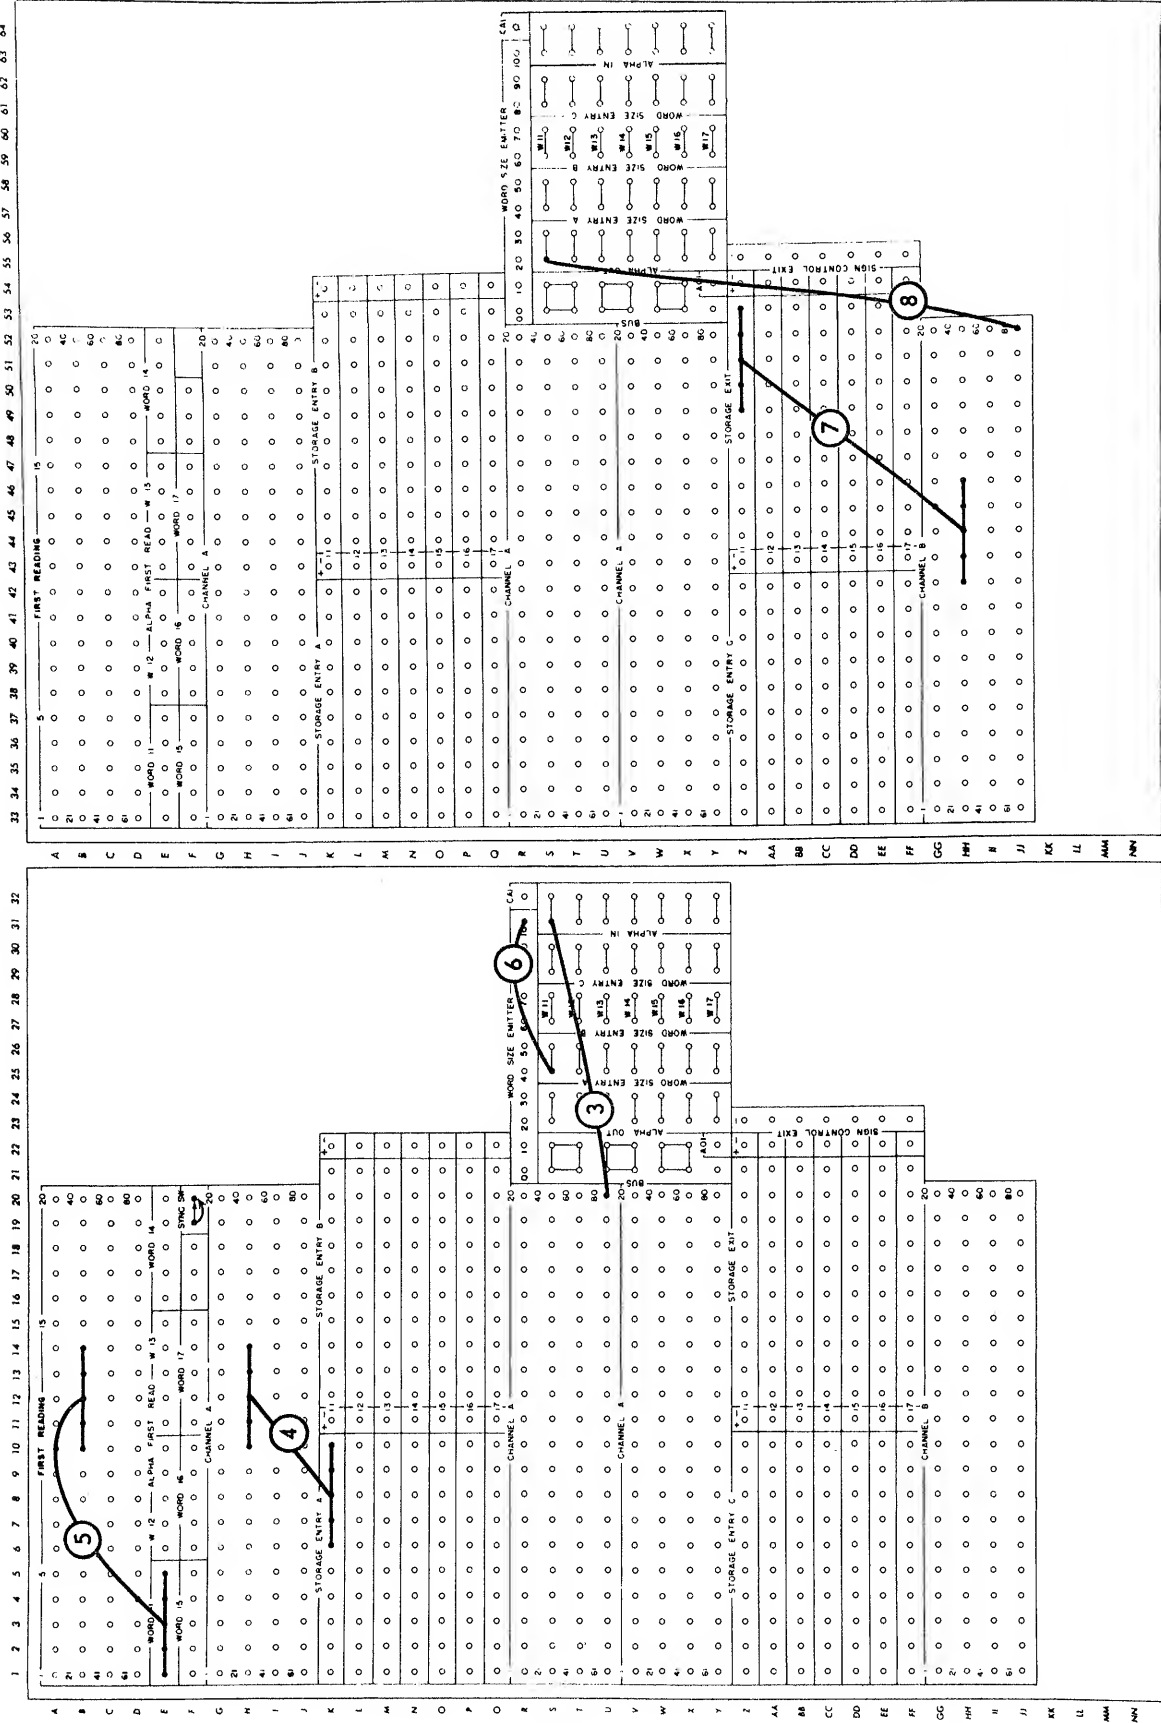

Figure 46. 654 Control Panel Wiring

### 407 CONTROL PANEL WIRING (FIGURE 47)

6. Word-size emitter 10 is wired to word-size entry A for word 11 to enter zeros in any unused positions within the word.

7. Storage exit of output synchronizer 2, while it is partially converted back to alphabetic information, is fed into channel B for transmission to the attached 407.

8. Control alphabetic information signal from 407 control panel through channel B to impulse alphabetic-out hubs of word 11. This conditions word 11 to emit impulses through the storage exit hubs.

8. Control alphabetic information impulse wired through pilot selector to channel B hub. Channel B carries impulse to 654 for use on its control panel.

9. The 8 stored in word 10 on the read operation on the 533 is now used to signal an alphabetic output. The units position of word 10 through control information 1 hub picks pilot selector 20

10. Pilot selector hold for selectors 15-20, which is marked 4, is wired to MC machine cycle to hold selectors through the print cycle.

11. Exit impulses of word 11 are brought through

Figure 48. Offset Stacking, 533

channel B hubs and wired to normal print entry where final conversion to alphabetic word (Jones) is completed.

### Half-Time Emitter

This device is available for both the 533 and 537. It is similar in operation to the digit emitter except that a half-time impulse starts when the corresponding digit impulse (12-9) ends, and stops when the next digit impulse begins. The half-time impulses are usually used to transfer selectors between two specific digits.

One or two half-time emitters can be installed in both the 533 and 537. When both are installed in the 533, one is timed to the reading function and is located next to the digit selector read. The other is timed to the punching function and is located next to the digit selector punch.

In the 537, both are timed the same, and can be used interchangeably. If the half-time emitter(s) is not installed, additional digit selectors can be installed.

### Offset Stacking Device

This device is available for both the 533 and 537. It is used to locate specified cards by offsetting them  $\frac{3}{8}$ " toward the front of the machine. The operation of the device is by control-panel wiring. When installed on the 533, it is placed in the punch stacker.

#### 533 Wiring Example (Figure 48)

This example illustrates ways of activating the offset stacker in the 533:

1. Any card in which a DPBC error is detected is offset.

2. Any card with an 11- or 12-punch in column 80 is offset one cycle after the 11 or 12 is read at the punch brushes. The one-cycle delay is achieved by using the punch delay.

3. Any card identified by control information 10 is offset two cycles after the card is punched at the punch station. The two-cycle delay is achieved by using two punch-delay units.

#### 537 Wiring Example (Figure 49)

This example illustrates ways of activating the offset stacker in the 537:

1. Any card in which a DPBC error is detected is offset.
2. Any card identified by control information 10 is offset two cycles after the card is punched at the punch station. The two-cycle delay is achieved by using punch delay.

NOTE: In the 537, the use of punch delay 1 or 2 will cause two cycles delay; the use of punch delay 3 or 4 will cause three cycles delay.

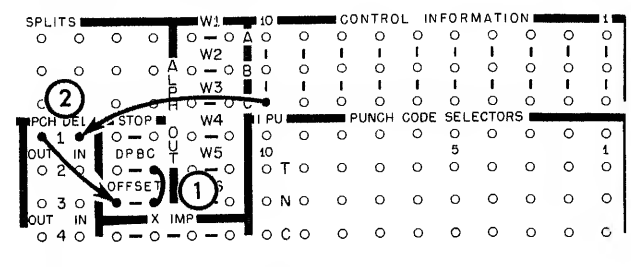

Figure 49. Offset Stacking, 537

## Read Code Selectors

The major function of this device is to recode card information into either 8's or 9's before it is entered into the system. The recoded information is usually entered into the system for interrogation by the branch distributor codes (90-99), or for use as control information words.

These selectors are available for both the 533 and 537 in one or two groups of five each. Associated with each group of read-code selectors is a corresponding group of punch-code selectors.

Each individual read-code selector consists of three associated control-panel hubs: IN 1, IN 2, and OUT. Associated with all of the read-code selectors is the RSO (Read Second Only) switch. The function of the IN 1 and IN 2 hubs is dependent upon the wiring of the RSO switch.

**IN 1.** This entry accepts 12-7 digit impulses, and is usually wired from first reading when RSO is *not* wired. Under these conditions the impulse entering IN 1 must occur one cycle before the impulse entering the corresponding IN 2. When the RSO switch is wired, IN 1 is usually wired from read card A, B, C. Under these conditions IN 1 and IN 2 must receive impulses during the same cycle.

**IN 2.** This entry accepts 12-7 digit impulses and is usually wired from read card A, B, C.

**OUT.** This is an exit hub. If both IN 1 and IN 2 receive an impulse (12-7), the corresponding OUT hub emits an 8-impulse during the same cycle that IN 2 is impulsed. If neither IN 1 nor IN 2 receive an impulse, the corresponding OUT hub emits a 9-impulse. If only one of the IN hubs receives an impulse, the corresponding OUT hub does *not* emit.

**RSO (Read Second Only).** When this switch is wired, both IN 1 and IN 2 must receive an impulse during the same cycle, if the corresponding OUT hub is to emit an 8 during that cycle. When this switch is not wired, the IN 1 hub must receive an impulse one cycle before the corresponding IN 2 hub, if the associated OUT hub is to emit an 8 during the cycle that the IN 2 is impulsed.

### Wiring Example (Figure 50)

This example illustrates the wiring of the read-code selectors when RSO is not wired:

1. Any digit impulse (12-7) read at first reading column 80 activates IN 1.
2. Any digit impulse (12-7) read at second reading column 80 activates IN 2.

Figure 50. Read Code Selectors

3. If both IN 1 and IN 2 are impulsed from the same card, the OUT hub emits an 8. If neither IN 1 nor IN 2 receives an impulse from the same card, the OUT hub emits a 9. If only one of IN hubs, receives an impulse from the same card, the OUT hub will not emit.

### Wiring Example (Figure 51)

This example illustrates the wiring of the read-code selectors when RSO is wired:

1. Both IN 1 and IN 2 are wired from second reading.
2. Either an 8- or 9-impulse is emitted from the OUT hub depending on the punching in column 80 of the card.
